THE GLOBAL LEADER IN PREMIUM PLUS SIZE FASHION

REACH NEW CONSUMERS ON SHOPPI

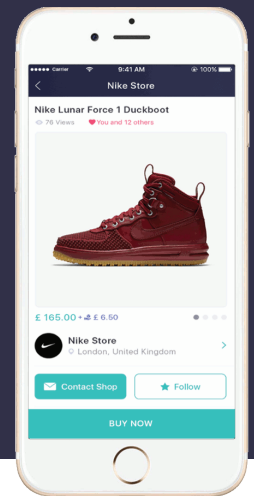

With over 5 billion active mobile users across the globe, mobile is becoming the most powerful tool to reach potential customers. It's expected that total mobile advertising spend worldwide will overtake television advertisements by the year 2017.

MOBILE MARKETING

Consumers increasingly use their mobile phones for other activities than calling and texting alone, such as browsing the mobile web, playing games, video chatting and taking notes.

All of these activities transform mobile into a very attractive marketplace that represents a huge potential for Advertisers to effectively reach otherwise unreachable clients in a new medium.

NEW CHANNEL PARTNER
